WHAT

BEHIND SURFACES is a study by
FEDERICO DELROSSO ARCHITECTS
into what lies behind, behind a
surface, a material, architecture
itself but also absence.

BEHIND SURFACES

This research has culminated in the new rug with the same name BEHIND SURFACES which is stripped of its decorative function, through a conceptual inversion of layers, investigating the concept of the other, exploring the depth of its materials, but also of the territory and culture.

HOW

An audiovisual and tactile installation designed to stimulate your senses in order to explore the relationship between the architectural project and traditional methods of Tibetan rug culture, investigating what lies behind a surface.

WHO

Federico Delrosso

Federico Delrosso founded his studio in 2001 and works in a very wide range of types of projects; residential, commercial and product design. Delrosso expanded his expertise internationally by opening a space in New York in 2012. His early experience in the field has consolidated a talent and a distinctive sensibility for spaces perceived in his projects as an intangible quality, which Federico Delrosso calls "the emotional fourth dimension". In his interiors as well as in his architectural projects, the masterful relationship between three-dimensional spaces and the elaboration of surfaces results in a sense of pleasant balance, a typical element found in fine architecture.

WHO

cc-tapis

cc-tapis is a design company specialised in handknotted rugs which are made in Nepal by expert Tibetan artisans. A strong respect for materials and for the culture of this ancient craft is reflected in the company's eco-friendly approach. The event will incorporate a new video illustrating the production process and the cc-tapis production facilities shot by Milanese photographer Lorenzo Gironi.
